👩🏻‍💻 I'm a Junior Fullstack Developer with a strong interest in building modern, user-friendly web applications.
I work with technologies such as JavaScript/TypeScrip, Java, Python(more for data analystic), SQL, React, Redux Toolkit, and Zustand, Tailwind. On the back end, I have experience with Node.js, Express.js, Fastify.js, Prisma ORM, MongoDB, and ClickHouse. I'm also familiar with Prebid.js, and design tools like Figma, as well as UI/UX principles. My goal is to become a valuable team member who can create efficient, high-quality solutions and contribute to meaningful projects.

EXPERIENCE

EVOPLAY ***(Mai-Aug 2024)***

As a ***Front-End Developer*** at EvoPlay, I developed responsive and user-friendly landing websites focused on mini-games using HTML, CSS, and JavaScript. My role involved creating visually appealing UI components, ensuring cross-browser compatibility, and optimizing website performance for seamless user experiences.

BIDMATIC.IO ***(September-October 2025)***

Completed a one-month ***full-stack internship*** at Adtelligent (Bidmatic), where I contributed to both front-end and back-end development. Worked with technologies such as React, TypeScript, Tailwind, Zustand, Node.js, Fastify.js, Prisma, MongoDB, and ClickHouse.
Gained hands-on experience in API integration, database optimization, ad implementation, and component-based architecture within a collaborative team environment.

PROJECTS

SPACE2STUDY, GITHUB-REPOSITORY

(React, Redux Toolkit, Node.js, MongoDB, TypeScript, Vite)

Developed React components for the learning platform, integrated REST API, and implemented Redux state management.

MONEY GUARD, GITHUB-REPOSITORY

(React, Redux Toolkit, Formik + Yup, Axios)

Money Guard is a comprehensive financial management web application designed to help users track their expenses, set budgets, and monitor financial goals.

AUCTIONLITE, GITHUB-REPOSITORY

(Java Script, styled with Taillwind)

Developed a responsive auction web application where users can browse listings, create auctions, and place bids using virtual credits. Implemented authentication, user profiles, and dynamic listing pages with API integration. Focused on responsive UI, client-side data handling, and clean component-based structure.
